

In partnership with Ford Motor Company, FSG retrofitted older, less efficient and effective lighting with new T8 and LED lamps and fixtures

**Owner**

Ford Motor Company

**Contractor**

Facility Solutions Group

**Contract**

\$28,000.000

**Contract Type**

Lighting Retrofits

**Locations**

Nationwide

---

**Lighting Fixtures Replaced**

116,434

**Annual kWh Reduction**

65,730,646

**Annual Estimated Savings**

\$4,430,589

**CHALLENGE**

For all auto makers, attention to detail is critical. For Ford Motor Company, efficient operations and a safe and comfortable work environment are necessary to ensuring those details do not get overlooked. **Outdated HID and fluorescent lighting in Ford plants were consuming too much energy**, as well as degrading in performance and cost effectiveness, creating a suboptimal workplace for team members. Ford needed to decrease energy consumption and increase task light levels in each link of their manufacturing chain.

**SOLUTION**

Facility Solutions Group brought Ford a custom solution designed to capitalize on the latest in energy saving LED technology, while also utilizing their existing electrical infrastructure. **Working side by side with Ford teams, FSG developed and executed a lighting retrofit program that would meet Ford's challenges with minimal interference to plant operations.**
